

W

hydro extractor

10kg and 15kg, manual and coin operated

Warwick hydro extractors provide reliable performance and long life.

The extractor is the ideal choice for all laundry applications where a high level of water is retained in the fabric after washing.

Incorporating a number of safety features, the Warwick hydro extractor is available in manual or coin operated models.

The hydro extractor is ideal for hotel and launderette operators who are looking for a safe, reliable and long lasting quality product.

Manual timer

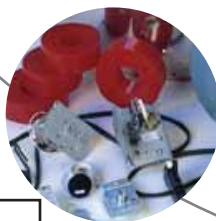

Controls the spin cycle time for up to six minutes.

Coin mechanism

The coin operated models come with a strong coin box housing, neatly mounted to the extractor.

Lid safety switches

A concealed safety device ensures the extractor does not operate until the lid is securely locked.
